

Node setup For Nakamoto Simulator

Phillip G. Bradford

Outline

This Nakamoto Simulator is a simple Stacks block explorer

It is built in React and JavaScript on your localhost

Installing node and npm on Windows

Assuming no node, npm on your machine
Install node and npm via nvm

Download and run: nvm-setup.exe

From <https://github.com/coreybutler/nvm-windows/releases>

```
Windows> nvm list
```

```
Windows> nvm install 22.14.0
```

```
Windows> nvm use 22.14.0
```
